

CLAIMS:

1. A culinary utensil provided with a first cutting means in the form of a series of spaced cutting teeth arranged on a first cutting member spaced in a lateral
5 direction, and a second cutting means arranged close to the first cutting means in the form of an elongate cutting edge which extends in the lateral direction.
2. A culinary utensil according to Claim 1 wherein the
10 first and second cutting means are both arranged on the first cutting member.
3. A culinary utensil according to Claim 2 wherein the first cutting member is provided with an opening
15 arranged along the length thereof, with the first and second cutting means on opposite sides of the opening.
4. A culinary utensil according to Claim 1 wherein the cutting teeth are of thin profile when viewed in a
20 direction perpendicular to the lateral direction.
5. A culinary utensil according to Claim 3 wherein the teeth are unitarily formed with the first cutting member, being bent downwardly therefrom.

6. A culinary utensil according to Claim 1 wherein the first cutting member is secured at opposite ends on the utensil to allow limited pivoting moment.
- 5 7. A culinary utensil according to Claim 6 wherein the utensil has an elongate handle and a U-shaped support on which the first cutting member is pivotally mounted.
- 10 8. A culinary utensil according to Claim 7 wherein a second member provided on the U-shaped support formed with at least one cutting edge.
- 15 9. A culinary utensil according to Claim 8 wherein the second member has two opposed cutting edges on opposite sides of an opening.
